

Your screening solution has arrived

Fresh air and open spaces now can be enjoyed without worry.

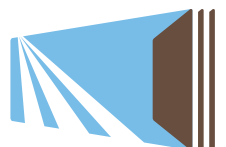

SCREENING SYSTEM

Also available as a standalone option for large openings

LACANTINA SCREENING SYSTEM

La Cantina Doors introduces a concealed screening solution for openings up to 24 feet wide and 10 ft high to ensure you never have to compromise your views. The screening system can be used singly, or paired together to allow for an infinitely adjustable opening position. This system fits seamlessly with any La Cantina Door system as it is available in custom colors and real wood veneer finishes and tucks away nicely with the hardware integrated into the door frame itself.

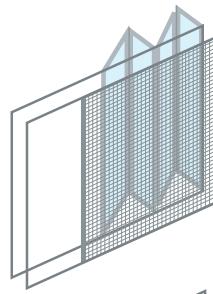

LACANTINA DOORS

La Cantina Doors supports green design and is a member of the U.S. Green Building Council

Screening system for large openings

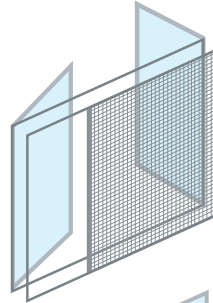

Bifold Doors

The LaCantina name remains synonymous with bifold door openings and our screen is ideally suited to use with the full range of LaCantina bifold systems.

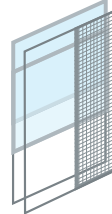

Sliding Doors

Large sliding doors and stacker doors are an ideal application for our screen. Most door openings can be covered by a single screen unit, and it would be a very large opening indeed that would not be accommodated effortlessly by a double unit.

French Doors

With single screen units accommodating openings up to 12 feet wide and 10 feet high, the screen is an ideal solution for screening even the largest French doors, all with a single completely retractable screen that operates with fingertip ease.

Windows

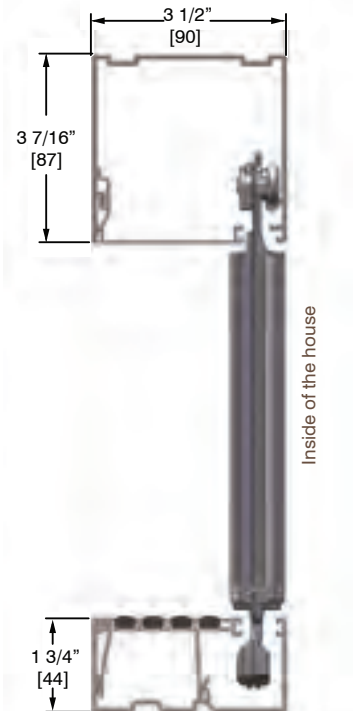

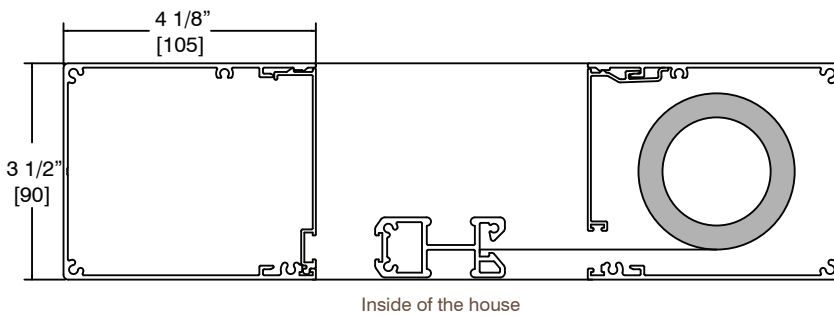

Banks of casement, double hung and bifold windows are all ideal applications for our screening solution. So easy to operate and virtually unnoticeable when retracted, the screen complements the architecture of the widest variety of homes and commercial premises.
